

1 Newdesk — stamp treatments + all six screens (Modernist structure x Paste-Up stamps)

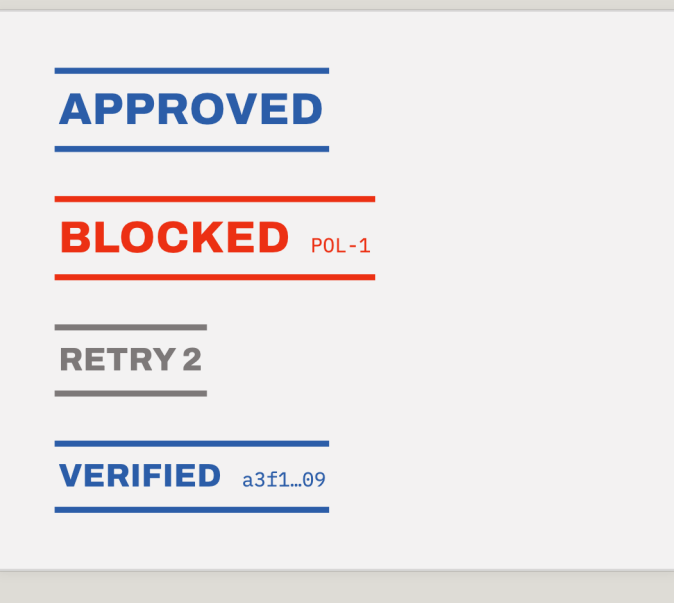

Assumptions: Modernist carries the chrome — Archive, flat 0-radius, 2px rules, putty ground, red accent. The spec's stamp system rides on top: Anton for stamps only, IBM Plex Mono for all provenance, approval-blue *Wiskash* derived in OKLCH to match the red's weight. Canary appears only as the wizard's active-step underline and selection borders. Sample story invented: "The \$1.1B Question" (CPB funding rescission). Screens use stamp 1a, as default — swappable.
